

Full Stack Developer experienced in building scalable SaaS, e-commerce, and management platforms using React.js, Next.js, NestJS, PostgreSQL, and Redis with strong exposure to backend systems, cloud infrastructure, and production architecture.

Portfolio • GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer

Fly Your Tech

Feb 2025 – Present

- Developing a multi-tenant construction management platform using React, Vite, ShadCN UI, NestJS, and PostgreSQL with role-based and membership-based access control systems.
- Implemented authentication, subscription billing, Redis-based rate limiting, background jobs, and file upload workflows using AWS Cognito, S3, BullMQ, and Razorpay.
- Built admin dashboards for analytics, payment tracking, maintenance controls, project management, and user administration workflows.
- Integrated OCR-based document processing pipelines using Python services and Gemini APIs for automated data extraction.
- Implemented AWS deployment workflows and infrastructure provisioning using Terraform and Dockerized services.

Full Stack Developer Intern

Fly Your Tech

Aug 2024 – Feb 2025

- Developed frontend architecture for an e-commerce saree platform using Next.js, Redux Toolkit, and Tailwind CSS from production Figma designs.
- Built dynamic homepage management systems, coupon workflows, media upload modules, and PayU payment integrations.
- Worked with PostgreSQL, TypeORM, Redis caching, JWT authentication, BullMQ queues, and cron jobs for scheduled notifications.
- Deployed and maintained applications on GCP and later migrated services to Dokploy/Hostinger-based infrastructure for cost optimization.

Software Developer

Devmind IT Solutions

Apr 2024 – Jul 2024

- Developed features for a live educational platform for medical students using Next.js, Firebase, Zustand, and Tailwind CSS.
- Built quiz and event modules while optimizing frontend rendering performance and user experience.
- Implemented Razorpay payment integrations with webhook-based payment verification for digital purchases.
- Improved Lighthouse performance scores from ~70 to 90+ through lazy loading, rendering optimization, and asset optimization strategies.

Freelance Full Stack Developer

2023 – 2024

- Built a job posting platform using React.js and NestJS with separate dashboards for admins and companies.
- Implemented JWT authentication, role-based authorization, approval workflows, and moderation systems.
- Developed analytics dashboards and management tools for monitoring listings and platform activity.
- Collaborated directly with the client on architecture and feature planning throughout the project lifecycle.

KEY PROJECTS

E-Thekedaar

React • NestJS • AWS • Redis • Terraform

Multi-tenant construction management platform with project collaboration, expense tracking, OCR-powered document workflows, subscription billing, admin dashboards, and cloud-native infrastructure using AWS and Terraform.

NestJS Starter Kit

GitHub

NestJS • Redis • Docker • Swagger

Production-ready NestJS backend boilerplate with standardized APIs, request-scoped logging, centralized error handling, reusable decorators/interceptors, and Docker-ready infrastructure.

Live Demo

Full-featured saree e-commerce platform with dynamic homepage management, coupon systems, payment integrations, notification queues, and scalable backend architecture.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Zustand, React Query, Tailwind CSS, ShadCN UI

Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, RBAC

Databases & Caching: PostgreSQL, MongoDB, Redis, TypeORM, Mongoose

Cloud & DevOps: AWS (Cognito, S3), GCP, Docker, Terraform, CI/CD, Vercel, Dokploy, Linux

Architecture & Systems: BullMQ, Background Jobs, Cron Jobs, Rate Limiting, Webhooks, Payment Integrations

Tools: Git, GitHub, Postman, VS Code

SELECTED ACHIEVEMENTS

- Improved Lighthouse performance scores from ~70 to 90+ through rendering and asset optimization.
- Built reusable NestJS backend architecture with scalable production-ready patterns.
- Implemented OCR + LLM-based document extraction workflows.
- Worked on Terraform-based AWS provisioning and cloud deployment workflows.

EDUCATION

Bachelor of Engineering (ECE)

CGPA: 7.3

ISL Engineering College, Hyderabad

Diploma in Engineering (ECE)

CGPA: 7.6

Nawab Shah Alam Khan College, Hyderabad
