

PROFESSIONAL SUMMARY

Full Stack Developer with experience building and maintaining scalable production-grade web applications across e-commerce, SaaS, and management platforms. Skilled in developing modern frontend systems using React.js, Next.js, Vite, Tailwind CSS, and ShadCN UI along with backend architectures using Nest.js, PostgreSQL, Redis, and MongoDB. Experienced in authentication systems, role-based access control, payment integrations, background job processing, caching, rate limiting, cloud deployments, and infrastructure workflows using AWS, GCP, Docker, and Terraform. Passionate about building performant, maintainable, and user-focused applications with clean architecture and modern engineering practices.

Core Expertise: Full Stack Development, Scalable Backend Systems, Authentication & RBAC, Redis Caching, Queue Systems, Payment Integrations, Cloud Infrastructure, Performance Optimization, Admin Dashboards

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Zustand, React Query, Tailwind CSS, Shadcn UI, Framer Motion

Backend: Node.js, Express.js, Nest.js, REST APIs, JWT Authentication, Role-Based Access Control, Rate Limiting

Database & Caching: PostgreSQL, TypeORM, MongoDB, Mongoose, Redis

Cloud & DevOps: Docker, AWS, GCP, CI/CD, Vercel, Firebase, Linux

Tools: Git, GitHub, Postman, VS Code, Chrome DevTools

Architecture & Systems: RBAC, Background Jobs, BullMQ, Queue Systems, Redis Caching, Rate Limiting, Webhooks, Payment Gateway Integrations, Cron Jobs

Cloud & Infrastructure: AWS Cognito, AWS S3, Terraform, Docker, GCP, CI/CD, Dokploy, Vercel

PROFESSIONAL EXPERIENCE

Full Stack Developer Feb 2025 – Present
[Fly Your Tech](#)

- Developing a construction management platform using React, Vite, ShadCN UI, Nest.js, and PostgreSQL with role-based and membership-based access control.
- Implemented AWS Cognito authentication, S3 file uploads, Redis-based rate limiting, BullMQ cron jobs, and Razorpay subscription workflows.
- Worked on admin dashboards for user management, payment tracking, maintenance mode controls, analytics, and project management features.
- Integrated OCR-based document processing workflows using Python services and Gemini LLM APIs for automated data extraction.
- Participated in AWS deployment workflows and infrastructure provisioning using Terraform and containerized services.

Full Stack Developer Intern Aug 2024 – Feb 2025
[Fly Your Tech](#)

- Developed the frontend architecture for an e-commerce saree platform (Malhaari) using Next.js, Redux Toolkit, and Tailwind CSS from Figma designs.
- Built dynamic admin-controlled homepage sections, coupon management systems, media uploads, and payment integrations using PayU.
- Worked with PostgreSQL, TypeORM, Redis caching, JWT authentication, BullMQ queues, and cron jobs for notifications and scheduled tasks.
- Deployed and maintained applications on GCP and later migrated services to Dokploy/Hostinger-based infrastructure for cost optimization.

Software Developer Apr 2024 – Jul 2024
[Devmind IT Solutions](#)

- Contributed to a live educational platform for medical students using Next.js, Firebase, Zustand, and Tailwind CSS.
- Developed quiz/event modules, optimized frontend performance, and achieved 90+ Lighthouse performance scores.
- Implemented Razorpay payment integrations with webhook-based payment verification for digital note purchases.
- Gained hands-on experience building and maintaining production applications using modern frontend architecture patterns.
- Improved frontend Lighthouse performance scores from ~70 to 90+ through rendering optimization, lazy loading, and asset optimization.

Freelance Full Stack Developer 2023 – 2024

- Built a job posting platform using React.js and Nest.js with separate dashboards for Admins and Companies.
- Implemented JWT authentication, role-based authorization, job approval workflows, and user moderation systems.
- Developed analytics dashboards with charts and management features for handling listings and user activity.
- Collaborated directly with the client on architecture and feature planning before project cancellation due to budget constraints.

KEY PROJECTS

E-Thekedaar React • Nest.js • AWS • Redis • Terraform

Multi-tenant construction management platform with project collaboration, expense tracking, OCR-powered document processing, subscription billing, role-based access control, admin dashboards, and cloud-native infrastructure workflows using AWS and Terraform.

NestJS Starter Kit NestJS • Redis • Docker • Swagger

Production-ready NestJS backend boilerplate with standardized APIs, SWR caching, request-scoped logging, centralized error handling, reusable decorators/interceptors, and Docker-ready infrastructure.

Malhaari Next.js • PostgreSQL • Redis • BullMQ

Full-featured saree e-commerce platform with dynamic homepage management, coupon systems, payment integrations, caching, notification queues, and scalable backend architecture.

EDUCATION

Bachelor of Engineering (ECE) CGPA: 7.3
ISL Engineering College, Hyderabad

Diploma in Engineering (ECE) CGPA: 7.6
Nawab Shah Alam Khan College, Hyderabad
